“To make the world a brighter place” is not only the motto of our company but also my personal ambition. I have been in the chemical industry for close to 20 years, currently heading the Global Electronics/Electrical & Appliances (EE&A) of Business Unit Polycarbonates at Covestro and will take over the role of China President starting from 1st July.

There are two things that are close to my heart – Circular Economy and Diversity & Inclusion. As Head of EE&A, I have been advocating the use of post-consumer recycled (PCR) polycarbonates in electronics and electrical appliances as a way to close the product loop and increase carbon productivity.

On the other hand, as the first female leader for Covestro China, I am committed to promote D&I in workplace by fostering an environment that allows people to flourish and develop to their fullest potential.
